QCD Money Market Fund

- a protected cell of QCD Open-Ended PCC Limited

March 2026

A partnership project by QNB & DMZ Finance, managed by CFMD

QCD Money Market Fund – Tokenization, Innovation & Application

First tokenized money market fund approved by DFSA

- Earns stable USD money market yield with investment grade quality within a regulated fund regulatory framework and on-chain transparency.
- Fund share tokens, minted on public blockchain, are designed to integrate with Decentralized Finance (DeFi).
- Managed by CFMD, Authorized and Regulated by the DFSA.

Innovation – a pivotal step in QNB's digital asset journey

- Designed for Qualified Investors by meeting their requirements in security, compliance & flexibility.
- Allows the QCD Money Market Fund tokens (QCDT) to be staked, loaned, borrowed or transferred among whitelisted Qualified Investors.

Application – bridging between traditional finance and the digital asset economy

- Paves the way for greater utility & new use cases via capitalizing on blockchain & smart contract technology.
- Designed to serve a wide range of institutional use cases : as eligible collateral for banks, for centralized changes, reserves for stablecoins and a foundational layer for Web3 payment infrastructure.

QCD Money Market Fund – Investment Objective & Fund Highlights

1

The QCD MMF's investment objective is to achieve near-term, stable returns while maintaining liquidity and security of capital by investing in money market instruments and short-term cash deposits and investment securities.

2

The Fund will invest primarily in high-quality short-term deposits, money market instruments and debt securities such as US Treasury Bills and US Treasury Bonds, or certificate of deposits, short-term investment grade corporate bonds, money market funds, money market ETFs.

3

The QCD MMF has a daily liquidity cycle, and it is easy to subscribe (mint) or to redeem (burn) fund tokens (QCDT). The minimum initial investment amount is USD 500,000.

4

In addition to documenting each investor's holdings in a register of shareholders, investors will also be issued with investment tokens, which are cryptographically secured digital representations of the redeemable, restricted-voting, Participating Shares in the QCD MMF.
The Investment Token (QCDT) will be issued on the Ethereum blockchain using a customized ERC-20-based smart contract tailored for Real World Assets.
The Investment Tokens is not tradeable but may be transferred only among "whitelisted" qualified investors' digital wallets. The applications or use cases will be progressively enhanced.

Investing In QCD Money Market Fund

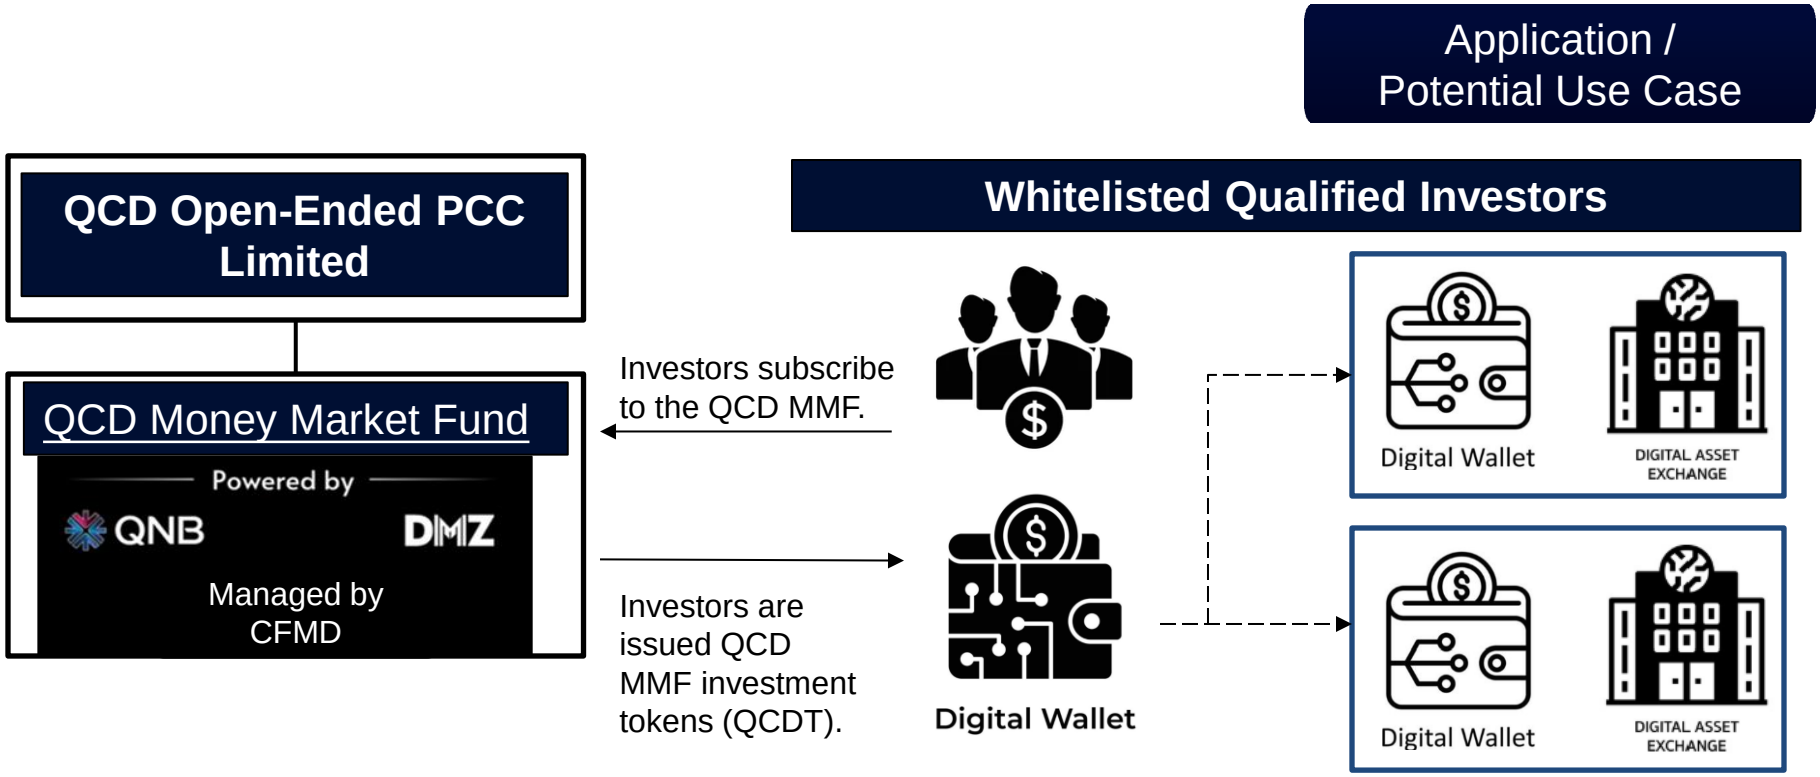
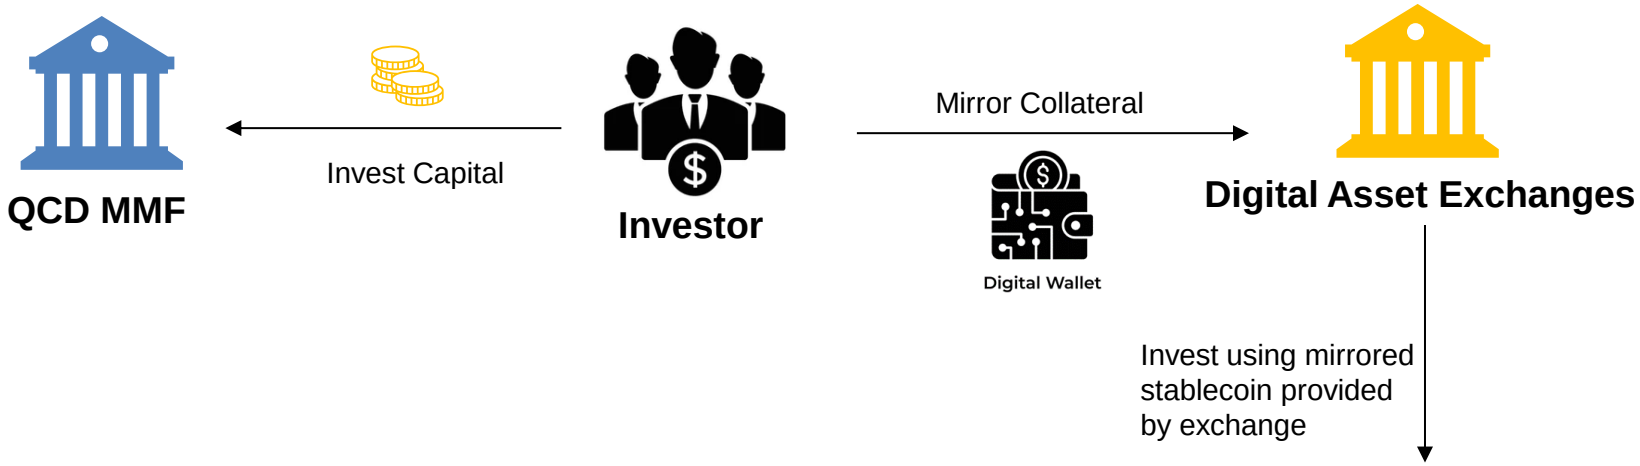
Asset Tokenization & Applications In Institutional Use Cases

QCD Money Market Fund – Technological Innovation



Investors may post QCD MMF investment tokens (QCDT) as collateral.

Example : How A Client Can Include Digital Assets Into Their Portfolio



Types of Digital Asset Strategies

- Strategy based on technical
- Strategy based on algorithm
- Strategy based on arbitrage opportunities
- Strategy based on yield
- Delta neutral strategy
- ……

Digital Asset Strategies Utilized by Client / Investor

- Stable arbitrage – cross-exchange arbitrage, future-spot arbitrage, funding rate arbitrage
- Lending – utilize the lending mechanism provided by exchanges to lend funds to leveraged trading participants, aiming for an annualized return rate between 8% and 25%.

Example : A Client Gains A Better Risk-Controlled Access To Digital Assets

Client Use Case — HK-Listed Financial Institution

A leading Hong Kong-listed financial institution, with core businesses spanning investment banking, asset management, and private equity, is currently onboarding QCDT as part of its strategic move into regulated digital asset investments. The institution recently announced plans to allocate USD 100 million into Real World Assets (RWA) and digital assets, aiming to enhance its portfolio diversification and long-term yield generation.

Use Case Scenarios:

Primary Requirement – Safe Custody Of Capital QCDT allows clients capital to stay in the Custody Bank (Standard Chartered Bank) while enjoying the Money Market Fund returns generated by the Investment Manager (Qatar National Bank).

Enhanced Yield Through Exposure To RWA And Digital Assets By using QCDT as mirrored collateral on centralized exchanges (CEXs), clients can deploy capital into on-chain strategies such as funding rate arbitrage and delta neutral strategies.
